

Lanthanum Nickel Cobalt

Alloys Powder

An alloy is a mixture of chemical elements of which at least one is a metal. Unlike chemical compounds with metallic bases, an alloy will retain all the properties of a metal in the resulting material, such as electrical conductivity, ductility, opacity, and luster, but may have properties that differ from those of the pure metals, such as increased strength or hardness.

Lanthanum Nickel Cobalt Alloy Powder mainly used for making hydrogen storage material. It is also used for battery material.

Stock No:
NS6130-05-527

Formula
 $\text{La}_2\text{Co}_1\text{Ni}_9$

Purity
99%

Form : Powder

CAS : 130469-99-7

APS:
40-50 μm
