

NS6130-02-278

Lanthanum STRONTIUM Magnetite Nanoparticles

Quick Facts

Product	:	Lanthanum Strontium Magnetite Nanoparticles
Stock No	:	NS6130-02-278
CAS	:	7439-91-0
Form	:	Powder

Purity
99.9%

Technical Specification

Molecular Weight	Density	Purity	APS
N/A	N/A	99.9%	20-40nm

lanthanum strontium manganite (LSM) is the most important electrode material in large-scale SOFCs and remains the practical choice for operation in the 700–900°C range because of its high electrical conductivity, high electrochemical activity. LSM is the most important and common cathode material, with excellent microstructural stability and long-term performance stability.

APS 20-40nm
