Silver Hexafluorophosphate Powder

Silver hexafluorophosphate, is an inorganic compound with the chemical formula AgPF_6 . It acts as an acidic catalyst in epoxide opening reactions and sulfonylation reactions, controlled initiator in polymerization reactions, and as an activator of catalyst in certain organic reactions. Silver hexafluorophosphate is a commonly encountered reagent in inorganic and organometallic chemistry. It is commonly used to replace halide ligands with the weakly coordinating hexafluorophosphate anion; the abstraction of the halide is driven by the precipitation of the appropriate silver halide.

Quick Facts

Product	:	Silver Hexafluorophosphate Powder
Stock No	:	NS6130-12-000951
CAS	:	26042-63-7
Purity	:	99.9%

Technical Specification

Molecular Formula	Molecular Weight	Melting Point
AgPF_6	252.83g/mol	102°C

ISO 9001:2015
