Sodium Carbonate Powder

Sodium carbonate (Na_2CO_3 , also called soda ash) is one of the largest volume mineral products in the inorganic chemicals industry. It's used in a wide range of industries, such as cleaning and personal care products, as a fungicide, microbicide, herbicide, and pH adjuster. Sodium carbonate can be used to produce sodium phosphates, sodium silicates, chrome chemicals and photographic chemicals. It is also used in baking soda production (an ingredient in the beverage industry). Soda ash can also be used in lieu of caustic soda as a less expensive alternative for pH adjustment/acid neutralization, sodium chemical manufacturing, kraft pulping, and flue gas desulfurization.

Quick Facts

Product	: Sodium Carbonate Powder
Color	: White Powder
Stock No	: NS6130-12-000921
CAS	: 497-19-8
Purity	: >99%
APS	: 40-60 μm
Other Metal	: 9500ppm

Technical Specification

Molecular Formula	Molecular Weight	Density	Melting Point
Na_2CO_3	105.98g/mol	2.54g/cm $_3$	851°C

Applications

- Chemical manufacturing
- Food (e.g., anticaking agent)
- Glass manufacturing
- Personal care products (e.g., bubble bath, toothpaste, bath salts and soaks, and scrubs)
